About Miracle Medley

All infants are born with the capacity for genius. The environment, which an infant is exposed to from birth and onwards, is the determining factor of how this capacity is facilitated, for the infant to develop into the best he or she can be.

There are many theories composed about intelligence, rooted in psychology, sociology, and other schools of science. These theories provide insight into the cognitive capacity of the human brain, and the possibilities of facilitating this capacity to enhance the development of human intelligence. Our mission, after a careful study of such theories, was to produce a curriculum for our nursery, which combines the best of the most prominent learning systems, to put together a 'miracle medley', or a certified, combined curriculum for our children, to better prepare them for their life in academia. Through certified exercises, academic curriculums, and linguistic enhancement procedures, our sole goal is to enhance perception, self-awareness, volition, and consciousness of the infant, to enhance his/her capacity for intellectual thought, which is the core of human intelligence.

Our Mission:

We aim to enhance your child's cognitive abilities, to better perceive information, form concepts, recognize patterns, make decisions, problem solve, plan, and communicate with the surrounding world, to prepare him/her for a successful future in academia.

Who are we?

We are a team of skilled academics from all over the world, brought together through a curriculum that is meant to kick-start and enhance your child's ability to process information, and get ready for the long trip in academia. Our goal is to make his/her learning a smooth process, starting from just three months old, and up to 12 years of age. Schooling doesn't have to be a hectic process, if the child is made ready for it from infancy.

What we offer..

The child's cognitive abilities are built through the child's interaction with the environment. Our job is to provide an environment, dense enough to cover all aspects that enhance the different forms of intelligence in the child, such as linguistic intelligence, logical and mathematical intelligence, bodily-kinesthetic intelligence, interpersonal and emotional intelligence.

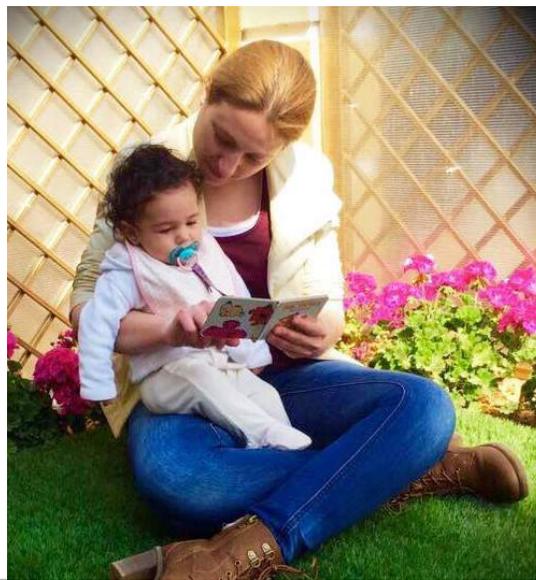

Research has shown that infants from the age of three months and above, have the mental capacity to learn up to 6 languages, four of which Miracle Medley offers through native-speaking teachers of French, German, English, and Arabic backgrounds.

The process of how the brain processes language, which has been the focus of neurosciences, cognitive sciences, linguistics, and the social sciences, requires the brain to perform certain activities, which in a way correlate to enhancement of the brain's intelligence. Some schools of thought have proven that infants have the capability to learn more languages at a younger age, than when older, and learning several languages, due to the process they enquire, help enhance a child's intelligence. We offer four languages to the child from the age of three months, for this sole purpose.

Our one-on-one applied private instruction

We believe every child learns his/her own way, and our obligation is to find out what makes each individual child unique. Each child is individually monitored, for the purpose of enhancing the development of a sense of identity and a sense of self. Most of our learning happens through activities in the classroom, but every child gets one-on-one applied private instruction every day, to make sure every child gets their fair chance to discover and be discovered. Preparing children for academic success is our mission, because we believe each child was born to change the world!

What we provide at the Miracle Medley Reading Club:

- Reading tutoring
- Games and fun activities
- Language skills enhancing activities
- Hot meals

Miracle Medley Reading Club

“The more that you read, the more things you will know. The more that you learn, the more places you’ll go”-Dr. Seuss. In our reading club, we not only strive to enhance the child’s reading skills, we also teach children to think about what they read, how to discuss their opinions regarding what they read, and how to analyze it. Teaching children critical thinking, and how to formulate educated opinions based on facts is one of the important keys to character building.

Our reading club has a special program for infants, to prepare them for reading adventures, as they grow older.

Miracle Medley Etiquette Club

At miracle medley, we start our day with an etiquette class, because we believe that being thoughtful of others is an important building block, when it comes to producing a positively active member in society. Our class teaches social etiquette, table manners, hygiene etiquette, and minding manners.

Miracle Medley Gymnastics Club

Intelligence doesn't thrive by simply sitting at a desk. Children have energy, which when put to positive use, can enhance their intelligence. At our gymnastics club, our instructors encourage hard work and discipline, along with teaching children about strength, grace, and flexibility. We have a specially designed program for very young children, to enhance their kinetic skills, and serve as a preparatory stage for their continuation in the field.

Miracle Medley Homework Club

Our tutors help children, not only finish their homework, but develop skills to enhance their independence. Such skills include how to build a homework timetable, a checklist of tasks for the child to follow, and how to manage their time wisely to make the best of their daily schedule, not matter how crammed. Not only does the homework get done, we teach children to manage their time without needing parental follow-ups. The core of our philosophy is to enhance the academic independence of the child, which is the key to future success.

What we provide at our sessions:

- A hot meal
- Tutoring
- Games and fun
- Extra activities to enhance language skills.

Miracle Medley Summer Camp

Miracle Medley Summer Camp, like no other, has a different theme every year. This year was our first summer camp at Miracle Medley Nursery, for ages 2 to 12 years. The theme for this year was “Self Discovery”. Through a series of activities, field trips, and collaborative projects, children had a chance to play, but also gain experience learning about themselves, their hobbies, interests, and find their passion. Over a span of four weeks, they also had the chance to learn horseback riding and swimming with professional coaches, music, the arts, and learn how to care for animals. Social skills, like team cooperation, and building friendships were also part of the core of our summer camp.

Miracle Medley Summer Camp is a very important part of our overall program, due to what it contributes to the character building of the child. At Miracle Medley, we use it as a chance for us to nurture children’s needs, to better prepare them for a brighter future. Building little miracles is the sole goal of our establishment, and every program we create is built for this purpose.

Stay tuned for yearly updates about our Miracle Medley Summer Camp!
